AFRICA

Simplify the Complex

Tired of having little time and stretched resources trying to ensure that the greens are on par, players have an enjoyable experience and that the “back office” runs like a well-oiled machine?

Add the conundrum of keeping up with ever-changing governance requirements, running your club (be it golf or otherwise) as efficiently as possible and finding new revenue streams, and your team is under even more pressure than was the norm before.

Turn Your Game Around

OnBoard Africa has partnered with the Club Management Association of Southern Africa to aid the digital transformation of clubs around the country.

Our modern solution allows users to record, store and track all resolutions and agreements in a central and safe place.

It is a must-have for any team (board, executive and committee) that relies on agendas, minutes and voting for purposes of effective management and good governance - especially if members are geographically spread or meet remotely given COVID challenges. Use it for approvals, eSignatures, synchronising calendars as well as recording policies and procedures.

OnBoard's complete board management solution offers every feature you could want with complete security available on every device - whether laptop, tablet or mobile phone - making use of Microsoft Azure which is the gold standard in cloud security. This means full disaster recovery, active geo-replication and peace of mind.

Acing Meeting Management

We are consistently highly-rated thanks to:

- Our modern design for forward-thinking teams
- Our user-friendly and intuitive interface
- A Software-as-a-Service cloud-based solution priced per user with unlimited usage
- Making a dedicated success manager available to assist you

Take the Next Step

As an organisation, we value software tooling that enables remote collaboration, reliable storage of information and documents as well as easy retrieval of that data. All these needs are catered to by the functionality of OnBoard.

Nyari Samushonga

CEO of WeThinkCode Holdings NPC

OnBoard has provided the CMASA team with a streamlined communication channel directly to our committee members. No more searching for emails or documents - everything is readily available online or on the app. The platform will effectively assist committee members in separating their committee roles from day-to-day tasks.

Roxanne Reeves

CEO of Club Management Association of South Africa
